ABSTRACT OF THE DISCLOSURE

In a notification system for notifying a user of a processing item at a specific timing in accordance with an information input about the processing item including an execution position and expiration date of execution, whether to notify the user of the processing item is determined on the basis of a distance between a current position of the user and the execution position included in the processing item, and a time difference between the current time and the expiration date of execution included in the processing item. A notification server, notification method, and recording medium are also disclosed.
